

# CONTINENTAL LIME INC.

July 10, 1985

Continental Lime Inc. is planning to install three (3) air quality monitoring stations in the very near future. The three (3) stations are described as Long Term, Short Term Max. and Background. (See Map.)

The long term station will be located on State lease property only. The remaining two (2) will be located on BLM properties. The short term max. will be located on Continental Lime Inc. millsite claims. The third and final station, designated Background will be located on BLM property Section #1 Range 9W Township 21S.

A 6' x 8' concrete foundation will be installed at the short term max and the background location. On each foundation a 5' x 7" scaffold will be mounted to hold the high volume sampler. To supply 115V power to each sampler, a ditch six (6) inches wide will be needed. Total length of ditch is 2000 ft. The total acreage proposed for disturbance is 1,096 sq. ft. or 0.025 acres.
